

ezCash, llc
retail automation solutions

September 27, 2006

ezCash, LLC (EZC) has recently entered into a contractual agreement with a major company who collects data and makes it available to interested third party manufacturers in a number of vertical markets.

EZC has more than a thousand customers, both single stores and chains, in forty five states. Our customers utilize EZC products in Convenience, QSR, Tobacco, Liquor and General Retail Stores. Recognizing the ease of use of EZC's touch screen Point of Sale and the value of our "real * time" interface with the EZC "real time" back office controller connected to Verifone and Gilbarco cash registers IRI has been qualified as a third party provider in this venture to capture and forward sales data.

If you are already scanning in your stores and would like to learn about the financial benefits of partnering with ezCash –OR - if you do not scan in your stores and would like to implement this capability please call me or email me. I will be happy to work with you to determine if your geographic location makes you eligible to become a member of the National Scanning Panel.

If you already have a Ruby or a G-Site you will save thousands of dollars while installing one of the industries best back office and price book systems. You will gain control of your in store inventory and of your fuel.

If you don't have scanning capable cash registers you will save thousands of dollars while installing one of the industries best touch screen Point of Sale registers.

If you are interested in learning more about ezCash give me a call at 256-327-5021 or email me at dthomas@ezcashllc.com . All forms and brochures can be sent electronically as well as next day delivery.

Thank you for your time and interest!
